

Tecumseh Road Construction Project

The Tecumseh Road Construction Project will NOT be completed before start of the school year. This will create significant traffic delays and safety concerns at the intersection of Tecumseh Road and Franklin Street.

We are therefore asking parents with older Elementary and Middle School aged children to refrain from dropping their children off at the Elementary School from 7:30 to 8:30 AM.

The School and Village developed drop off points where parents can drop-off their children within one block from the school. The drop-off points are located so that children can walk to the crossing guards for assistance crossing Tecumseh Road. Parents who must drive their children to school are asked to drop their children off at one of the following drop-off points:

1. East Church and Currier Street (North side of East Church Street)
2. West Church Street and Tecumseh Road (South side of West Church Street)
3. West Franklin Street and Tecumseh Road (South side of West Franklin Street)
4. Clark Street and Tecumseh Road (North side of Clark Street)

Parents are encouraged to discuss the situation and practice using the new drop-off points with their children prior to the start of school. It is important that parents with older Elementary School aged children use the drop-off points during the Tecumseh Road Construction Project.
