

VILLAGE OF CLINTON

WOODCHIP AND COMPOST PROGRAM

The Village provides a composting and woodchip/mulch program. Those materials are available for no charge if individuals pick them up at our compost site. Periodically, however, the Village is asked to make deliveries. Our policy is as follows:

1. There will be no charge to deliver a load of woodchips/mulch to a home within the Village limits if coordinated with the Village's brush chipping schedule.
2. There will be a \$30.00 charge to deliver a load of woodchips/mulch outside the Village limits if within a five-mile radius and coordinated with the Village's brush chipping schedule.
3. Village residents will be charged \$30.00 for delivery of woodchips/mulch or compost material if it has to be loaded from the compost site.
4. There will be a \$30.00 flat fee and a charge of \$2.00 per mile, both ways, for deliveries outside of the Village, if the Village has to load the material from the compost site.
5. All payments must be made in advance.
6. Charges may be waived in whole or part if the Village is in need of removing excess material from the compost site.

I acknowledge that I have read the above information and understanding the costs and delivery procedures of woodchips/mulch and compost. I have examined said woodchip/mulch material and I am satisfied with the consistency, composition, and color of said material. I further acknowledge that once I have received delivery of the material, I cannot require the Village nor any of its employees to pick-up and remove material.
